

Age-sex-standardised reimbursed glucagon-like peptide-1 receptor agonist use

Regional rates per 100,000 residents; France, 2025

Source: Open Medic and the French National Institute of Statistics and Economic Studies. Rates use average annual population denominators. Standardised rates use the 2025 France-wide age-sex distribution. Regional group 93 combines Provence-Alpes- Côte d'Azur and Corse; group 5 aggregates overseas regions and departments. Analyses are descriptive.
