

Age-sex-standardised reimbursed glucagon-like peptide-1 receptor agonist use

Regional rates per 100,000 residents; France, 2025

Sources: Open Medic and the French National Institute of Statistics and Economic Studies. Rates use average annual population denominators. Standardised rates use the 2025 France-wide age-sex distribution. Provence-Alpes-Côte d'Azur and Corsica form one analytical grouping. Overseas regions and departments are available only as a combined grouping. Analyses are descriptive.
